Planet Earth

Planetary data for Earth

Planet Earth is the third planet from the Sun in our solar system. It is a unique and diverse world, home to a wide variety of life, including humans. Earth has a rich atmosphere that sustains life, vast oceans covering much of its surface, and a diverse range of ecosystems, making it a remarkable and beautiful planet.

Planet Mars

Planetary data for Earth

Mars, often called the 'Red Planet,' is the fourth planet from the Sun in our solar system. It's a world of stark, otherworldly beauty, characterized by its rust-colored surface. Mars has fascinated astronomers and space enthusiasts for generations. It's a planet with a thin atmosphere, a history of possible liquid water, and it's a prime target for future exploration, including the search for signs of past or present life.
